

**“Sperry has worked on three projects for me. That I would hire them back to back to back speaks volumes.”**

I trust Sperry & Associates. Their reputation for quality is well deserved Sperry completed our 56,000 square foot state-of-the-art facility in 1999. We stayed “open for business” the entire 10 months we were under construction. They’ve also done renovation work and are now working on a second floor addition to our main facility.

Sperry guided us through all the processes, treated our projects like they were their own and always went to bat for us when dealing with construction rules, regulations and permitting.

After all is said and done... you can count on Sperry. That’s why they have three of my projects... and counting!
