

**“Sperry’s performance is why we
did business with them again.”**

Year’s ago, Flightline hired Sperry to build an addition to one of our hangars. As a result of our relationship built on past performance, we asked Sperry to team with us again. Construction on 45 new hangars began just days after 9-11. Even with the extraordinary challenge of working with our airport’s security restrictions, Sperry was able to complete the project on time and within budget.
