

“Thanks to The Sperry Team’s steady hand all the critical dates were met.”

From the start, Sperry & Associates made us feel comfortable about this project. There was a great deal of work to get done and a short time to do it in, but thanks to The Sperry Team’s steady hand all the critical dates were met and we were able to get the production lines up and running on time.

Gene D’Torio
Relocation Manager, Danfoss TurboCor

Sperry’s construction team exercised very good control over their consultants and subcontractors and presented the City with a completed project characterized by high quality workmanship. Sperry’s professional attitude, clear communications and assertiveness in getting issues resolved resulted in the project maintaining the tight schedule while also maintaining a high level of harmony between the design/build team, the Danfoss-Turbocor Company and the City of Tallahassee.

Michael H. Scheiner
Chief of Construction Administration
City of Tallahassee
